

Power Efficiency Surveys

A power efficiency survey will identify potential real-world savings in a plain, easy-to-read format - without needing to make changes to equipment or plant operations.

Benefits Of A Power Survey:

- ✱ A detailed action plan to lower energy bills - typically saving 15-25%
- ✱ Costs for the improvements may be recovered in months, not years
- ✱ Helps to achieve your environmental and carbon reduction targets
- ✱ Monthly payment options and government assistance may be available

If you would like to save money and reduce emissions from use of electricity, please contact us for more information.
